PROFESSIONAL SUMMARY

AI Developer specializing in Deep Learning and Computer Vision, with hands-on experience in building real-time AI systems and scalable machine learning pipelines integrated with web applications. Strong expertise in model optimization, experimental architecture design, and deploying robust, production-ready AI solutions.

EXPERIENCE

AI Developer – GROW AI (iQue Ventures Pvt. Ltd.), Bengaluru (2026 – Present)

- Developed real-time person detection and multi-object tracking systems for video analytics applications.
- Engineered end-to-end pipelines for live camera stream processing with optimized inference performance.
- Enhanced detection robustness through threshold tuning and tracking refinement.

AI Developer – Owlytics (iQue Ventures Pvt. Ltd.), Bengaluru (2025 – 2026)

- Designed and implemented deep learning models for detection and recognition tasks.
- Built scalable ML pipelines covering preprocessing, training, evaluation, and deployment.
- Integrated AI models into production backend systems.

Assistant Technical Writer – Rpinnacle Research Solutions, Tamil Nadu (2024 – 2025)

- Produced technical documentation for deep learning and data science research.
- Contributed to dataset analysis, experimental evaluation, and comparative model studies.

TECHNICAL SKILLS

- **Frontend Development:** | HTML5, CSS3 | React.js | JavaScript |
- **Backend Development:** | Python | FastAPI, Flask | RESTful API Design |
- **Databases & Cloud Services:** | AWS (EC2) | Supabase | PostgreSQL, SQLite |
- **Artificial Intelligence & Computer Vision Models:** | PyTorch, TensorFlow, Keras, OpenCV, NumPy | YOLO | Machine Learning, Deep Learning | Classification, Prediction, Object Detection | Multi-Object Tracking (MOT), Action Recognition |
- **Optimization & Video Processing:** | Optimization Techniques, Metaheuristic Algorithms, Model Optimization | RTSP, WebRTC, MJPEG Streaming |
- **DevOps & Version Control:** | Git, GitHub, CI/CD Pipelines |

PROJECTS

AI Real-Time Person Detection, Recognition & Tracking System (2026)

- Built a real-time AI video analytics system using YOLO and MOT for person detection, tracking, and unique counting.
- Used InsightFace buffalo with SCRFD + ArcFace for face recognition and 512-D embedding matching.
- Optimized RTSP stream processing using OpenCV / FFmpeg, ONNX Runtime, CUDA / cuDNN, with face quality checks.

AI Cricket Shot Classification & Batting Analysis System (2026)

- Developed a cricket shot classification system using CNN-LSTM with MobileNetV2 for video classification and action recognition.
- Designed preprocessing and feature engineering pipelines for model training.
- Implemented backend for confidence scoring and performance tiering.

Vision Snap – Computer Vision Dataset Tool (2025)

- Developed a dataset generation tool using React and modern JavaScript.
- Implemented webcam capture, video frame extraction, and automated dataset packaging workflows.

ALL IN ONE – OCR Web Application (2025)

- Built a JavaScript-based OCR web application with modular architecture and responsive UI.
- Extracted text and images from documents and scans with structured multi-page processing.

Hospital Management System with Brain Tumor Detection (2024)

- Developed a Django-based hospital management system with authentication workflows.
- Integrated deep learning-based tumor detection and medical reporting.

Tech Media Community – Collaborative Learning Platform (2023)

- Built a full-stack collaborative learning platform with secure authentication and dynamic rendering.

INTERNSHIPS & CERTIFICATES

Python/Django Intern – Clovion Tech Solution Pvt. Ltd., Tamil Nadu. (Jan - Mar 2024)

In-Plant Training – iTrobes Technologies Pvt. Ltd., Tamil Nadu. (July 2022)

Python Programming Intern – Srishti Innovations, Technopark, Kerala. (July 2023)

EDUCATION

B.E. Computer Science and Engineering

Bethlahem Institute of Engineering, Tamil Nadu (2020 – 2024)
